

EMERGENCY BATTERY BACKUP

Description:

Our Emergency Battery Backup has a high-performance Lithium Iron Phosphate (LiFePO₄ or LFP) battery and Emergency LED Driver. It offers 90 minutes of backup power and recharges in 24 hours. Use it with LED Canopy, LED Panel, and LED Wall Packs.

LFP batteries last 8-10 years, while NiCD or NiMH batteries usually need replacement after 3-4 years. It offers 40% higher energy efficiency, reduced heat generation during charging, and longer charge retention.

Features:

- SKU: NUR-OD-BATTERY
- Long Lasting Lithium Iron Phosphate battery (LiFePO₄ or LFP)
- 90-minute backup power
- Recharges in 24 hours
- 40% more energy efficient than comparable batteries
- Damp Location Rated

Applications:

- Emergency Lighting
- Canopy Lighting
- Panel Lighting
- Wall Pack Lighting

Dimension:

Technical Specifications:

Input Current	80mA
Input Voltage	100-277V AC, 50/60 Hz
Input Power	5-watt
Output Voltage	15-55V DC
Output Power	6.6-watt
Temperature range	68°F to 122°F
Lifespan	8-10 years
