

EXTRA WIDE RECESSED ALUMINUM CHANNEL

DESCRIPTION:

The Extra Wide Recessed Aluminum Channel is a sleek, low-profile aluminum channel designed for high to medium output flexible LED strip lights. Ideal for professional lighting setups, this channel serves as both a protective housing and heat sink to prolong the life of your LED strips.

FEATURES:

- Sharp industrial design with clean lines.
- High-quality PC diffuser ensures uniform and soft light distribution.
- Constructed from AL6063 aluminum profile known for superior heat dissipation.
- Simplified recessed installation process using clips.
- Screwless end cap design allows for straightforward setup.

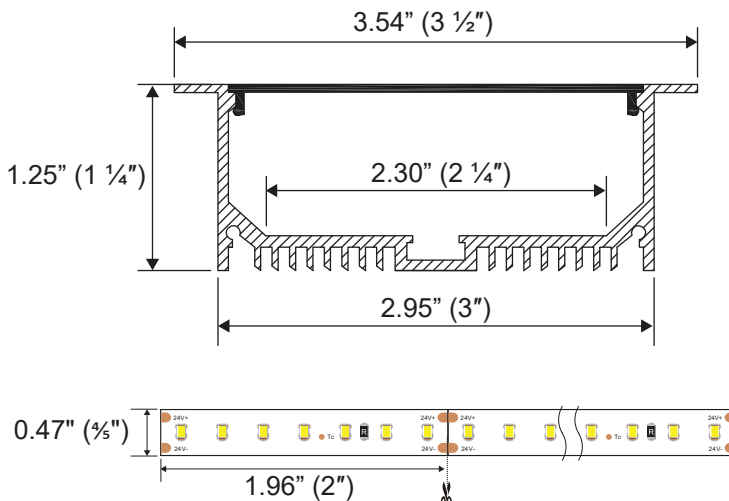

APPLICATIONS:

- Under Cabinet Light
- Cove Light
- Ceiling Light
- Hotel Light
- Conference Room Light
- Supermarket Light
- Exhibition Halls Light
