

# DOUBLE WIDE SQUARE RECESSED ALUMINUM CHANNEL

## DESCRIPTION:

This Double Wide Square Recessed Aluminum channel is designed for installing LED strip lights of 0.79 inches wide in various settings. This aluminum channel with silver anodized surface provides a sleek lighting solution. Constructed from high-quality Aluminum 6065-T5, it efficiently dissipates heat to extend the lifespan of LED lights. A durable plastic cover ensures even light distribution. This product is ideal for both commercial and general indoor lighting applications.

## FEATURES:

- Constructed with durable 6065-T5 aluminum for long-lasting performance.
- Includes a diffused polycarbonate cover for even light distribution.
- Accommodates LED strips up to 0.79 inches wide for flexible lighting options.
- Silver anodized finish enhances corrosion resistance and aesthetics.
- Trimless recessed installation for a sleek and modern appearance.

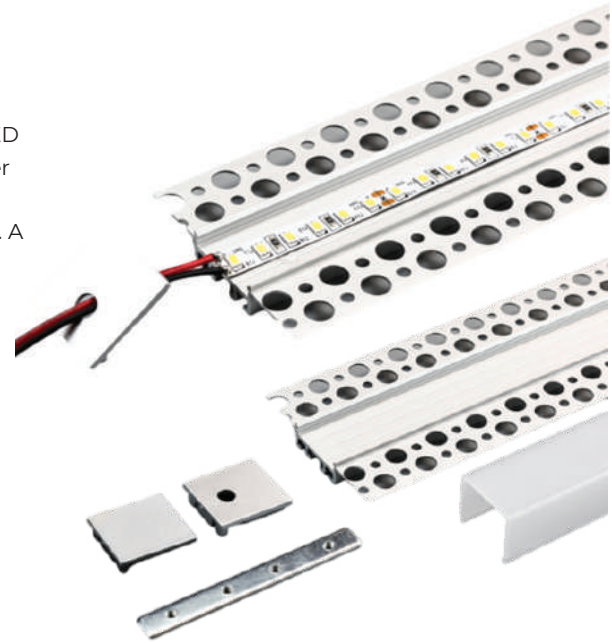

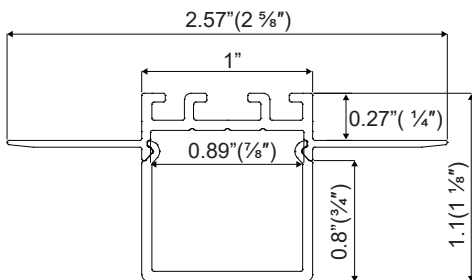

## APPLICATIONS:

- Residential and commercial indoor lighting installations.
- Architectural and decorative lighting.
- Retail displays, shelves, and showcases.
- Accent and task lighting for offices or home spaces.
