

SNAP WIRE CONNECTOR

DESCRIPTION:

The Snap Wire Connector in blue is a high-performance solution for connecting all conductor types. Supporting wire sizes from 12–24 AWG, its durable design ensures secure, touch-safe, and maintenance-free connections. With a lever mechanism for easy operation and built-in test points for quick verification, this connector is ideal for demanding applications.

FEATURES:

- Supports solid, stranded, and fine-stranded conductors.
- Accommodates wire sizes 12–24 AWG.
- Simple lever operation for fast and secure connections.
- Compact, reusable, and touch-safe design.
- Built-in test points for troubleshooting and verification.
- Approved for grounding and bonding applications.

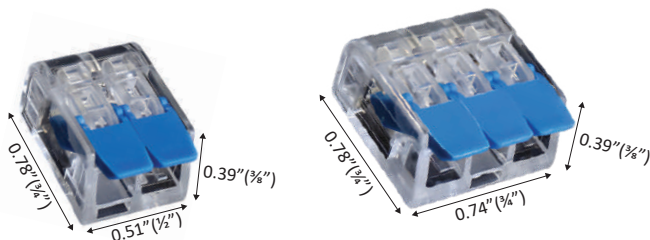

APPLICATIONS:

- Industrial and commercial electrical wiring.
- LED installations requiring fine-stranded wires.
- Appliance and equipment connections.
- Electrical panel and junction box wiring.
- Professional-grade electrical installations.

TECHNICAL SPECIFICATIONS:

Connector Type	Snap Wire
Number of Contacts	2 and 3
Wire type range	24 to 12 AWG
Material	Copper
Voltage	600V
Connection Type	Lever-operated splicing
