

UP DOWN ALUMINUM CHANNEL

DESCRIPTION:

The Up Down Aluminum Channel is an innovative lighting solution designed to accommodate both vertical and horizontal installations. Compatible with LED strip lights up to 0.55 inches wide, this extrusion enhances lighting aesthetics while functioning as a heat sink to extend LED lifespan. It provides bi-directional illumination, offering a stylish up-and-down lighting effect when installed vertically and a reflected wash effect when mounted horizontally.

FEATURES:

- Made with high-quality AL6063 aluminum for durability and efficient heat dissipation.
- Compatible with LED strips up to 0.55 inches in width.
- Bi-directional light diffusion for stunning visual effects.
- Surface finish: Anodized for enhanced aesthetics.

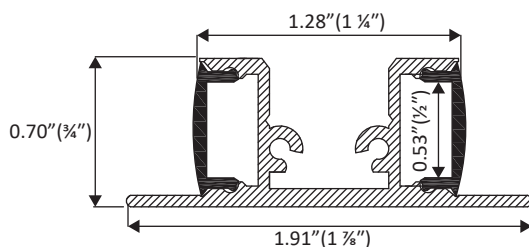

APPLICATIONS:

- Hotel lighting installations.
- Living room accent lighting.
- Corridor and hallway illumination.
- Decorative lighting for ceilings and walls.
